For Dispense and Assembly

MRSI Systems Acquisition is Completed

Today, we announce some exciting news as we enter the next chapter of our successful thirty year long history. The acquisition from Newport Corporation of MRSI Systems, a company established by the existing management team, is completed as of January 24, 2014. There have been no changes to the location, day-to-day operations or management of the MRSI business, as a result of this transaction. The existing, long-term MRSI management team and employees are committed to continuing to serve the needs of our customers, with renewed energy and focus on expanding the capabilities of our products and services.

MRSI was founded in 1984 with the goal of being a world leader in precision automation systems. Over the years, we have remained focused on providing our world-wide customers with the highest quality turn-key die bonding and dispense systems and related services. At the same time, Newport's business model moved away from fully integrated system-level solutions. This became the rationale for the subsequent divestiture. There will not be any changes in your contact points, and there will be no change in the support or service you have been accustomed to receiving from MRSI.

You are a valued customer of MRSI Systems, and our goal is to make this transition as smooth and seamless as possible for you. MRSI Systems will honor all existing agreements and outstanding purchase orders and quotations in accordance

with their terms. All sales, manufacturing and engineering operations relating to your programs will remain intact, and this transition will not cause any delay or interruption in the supply of products and services to you.

We look forward to your continued business, as we focus on your short and longer term needs over the years to come!

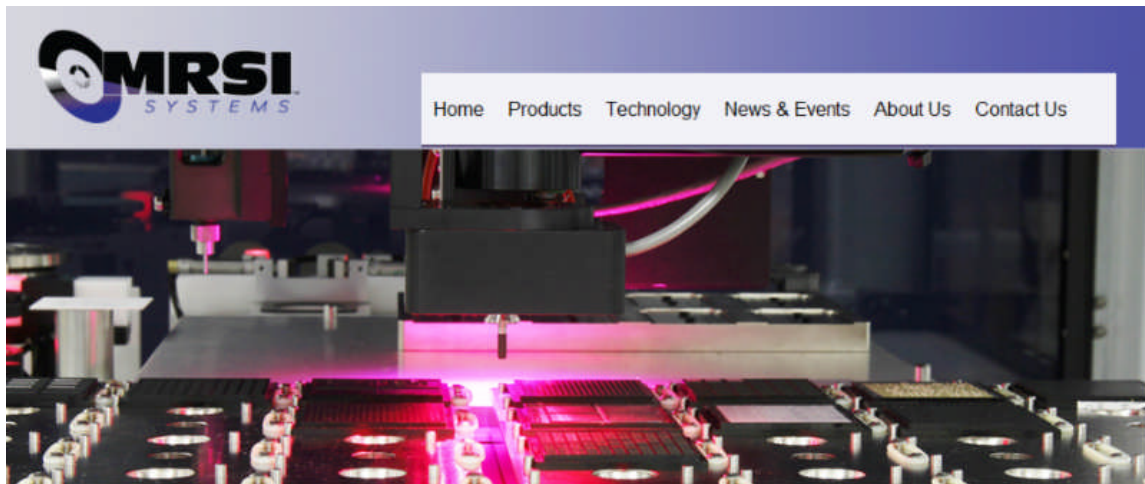

On behalf of the MRSI Systems team,

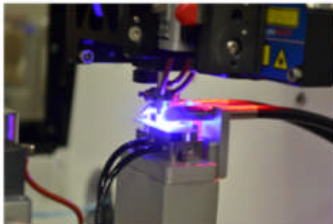

Michael Chalsen
President

MRSI Systems Launches New Website

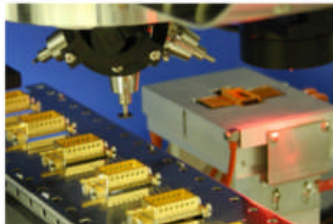

MRSI Systems is excited to launch our new website. Thanks to our loyal customers for their ongoing support. Please Visit www.mrsisystems.com and take a look!
