## **Solutions Newsletter**

For Dispense and Assembly

### **MRSI Sponsors First Robotics Team**

#### **Billerica Memorial High School's FIRST Robotics Team 4909 Shines**

FIRST® is an international not-for-profit organization founded by inventor Dean Kamen to inspire young people's interest and participation in science, technology, engineering, and math). The organization offers programs with leadership opportunities and hands-on experiences in robotics engineering and invention challenges for students in K-12.

The Robotics Competition (FRC®) competition combines the excitement of sport with the rigors of science and technology. Under strict rules, limited resources, and time limits, teams of 25 students or more are challenged to raise funds, design a team "brand," hone teamwork skills, and build and program robots to perform prescribed tasks against a field of competitors. It's as close to "real-world engineering" as a student can get. Volunteer professional mentors lend their time and talents to guide each team.

Students get to:

- Learn from professional engineer
- Build and compete with a robot of their own design
- Learn and use sophisticated software and hardware
- Compete and cooperate in alliances and tournaments
- Earn a place in the World Championship
- Qualify for over \$20 million in college scholarships

The teams receive support from over 200 of the Fortune 500 companies. The Billerica Memorial High School is supported by MRSI Systems.

A new movie starring Jamie Lee Curtis, George Lopez, Carlos PenaVega, and Marisa Tomei Highlights FIRST® Students' Famous Underdog Robotic Victory against MIT'Spare Parts' Debuts in Theaters Nationwide on January 16 Featuring Robots Built by FIRST Teams.

Join us at Semicon China & OFC

**We hope to see you at the trade show!**

We have a full trade show schedule in 2015. We are preparing for the Optical Fiber Conference (OFC) in Los Angeles and just finishing Semicon China in Shanghai. If you attend, we look forward to seeing you.

You are always welcome to come visit us at our Billerica factory. Contact us with your dispensing and assembly challenges. Chances are we have already solved them!
